Tree Care FAQs:

1. My tree seems unhealthy. How do I diagnose its symptoms so I can treat it?

While we do not have a tree specialist here at the conservation district, WY State Forestry Division has excellent resources to help landowners with tree care. You can find their Tree Symptom Decoder tool online at:

https://wsfd.wyo.gov/forestry-assistance-programs/community-forestry/educational-technical-resources/tree-symptom-decoder#h.p ID 114.

So long as you can correctly identify the type of tree, this guide should help you understand potential diseases, pests, nutrient deficiencies that may be occurring and how to treat t hem.

2. Where can I find a professional tree care service nearby?

Here's a website that has various professional tree care services listed:
